

Pediatric: Growing up Well with Hearing Loss?

Last revision: 10/21/2025

...by: (initials) EMN, vik

Use the fields beyond as a guideline to describe the IDeA that you have discovered. You don't have to fill out all the fields. Share it at any level of maturity.

What is the target group? (Adults, kids, patients with special difficulties, communication partners...?)

Which need does it address/ what question does it help to answer?

In which situations will it be used? (In the clinic, before consultations, in daily life situations...)

What are the outcome/ benefit?

How will the outcome be documented? :

Describe the idea:

By Joni Johnson on Mon Oct 04, 2010 05:38 PM (Forum – Most substantial question)

How do we adapt this notion of Living Well with Hearing Loss to Growing up Well with Hearing Loss for our pediatric patients?

How can we make this the LAST generation of people who feel stigmatized by having hearing loss? In other words, how do we create a wave of change that carries forward into greater personal and societal acceptance and support for our clients in our broader culture?

What does it look like? (Draw it and insert a photo of your drawing, insert a link to similar things or...)

Difficulties: (Issues you have in mind, that we have to take in consideration regarding this IDeA)

Is it similar to -or based on- similar solutions? Then which? (Insert a link)

How is it used? (Step by step...)

Theoretical references:

Experiences: (that have led to this IDeA)
